

11-13 October 2016

**LE MERIDIEN DUBAI HOTEL & CONFERENCE CENTRE
Dubai, UAE**

2016 International Building Code Firestop & Effective Compartmentation 'DIIM' Symposium Dubai

AGENDA AND HOTEL INFORMATION

Firestopping and Effective Compartmentation systems that are properly installed to the tested and listed system specs are universal critical elements of fire- and life-safety.

Total protection begins with good Design, continues with proper Installation, is verified with thorough Inspection and then is completed with regular Maintenance and Management of installed systems. Having and implementing a thorough knowledge of the 'DIIM' of Firestopping and Effective Compartmentation, as well as of Fire Walls, Fire- and Smoke-Rated Barriers and Smoke Partitions, provide greater reliability of installed Firestop Systems for improved Fire- and Life-Safety in buildings.

At the International Building Code Firestop & Effective Compartmentation 'DIIM' Symposium Dubai, delegates will attend an array of educational sessions focused on each of the elements of the 'DIIM' of Firestopping - Design, Installation, Inspection and Maintenance/Management, as well as a session focused on the codes and standards updates.
