Barrier Management Symposium

May 12, 2014

Nestor Sanchez, USG Corporation
Learning Objectives

1. Explore the gypsum mineral and its impact on fire resistance in a systems basis
2. Understand the different types of gypsum core and their relation to fire resistance
3. Determine recognized methods for repair installed gypsum panels
4. Innovative Technology
Fire Containment – Compartmentalize
Gypsum Mineral

- Calcium Sulfate
- CaSO$_4$·2H$_2$O
- 20% water by weight
Gypsum Mineral

- ASTM E 119 2hr. 1900°F
Gypsum Mineral

1” back  950° F
Gypsum Mineral

2” back  220° F
Gypsum Mineral

4” back  180° F
Gypsum Mineral

6” back 130° F
Hose Stream Test - Exposed Side
Cold-Formed Steel Background

33 Mils = 20 ga
43 Mils = 18 ga
54 Mils = 16 ga

68 Mils = 14 ga
97 Mils = 12 ga
1 to 4 Hour Ratings
### Gypsum Core Types

Three (3) Types of Gypsum Cores

- Regular Core
- Type X
- Type C
Panel Strength Comparison

- Simple Test @ 1850°F
- 13” x 13” x 5/8” Panels
- Regular, Type X & Type C Panels
- 12lb - 9oz. loading
Significance of Test

- Type X core ≠ Type C core
- Specify board type per UL design
- Specified panel must be installed
Floor-Ceiling Prior to Test
GA-605 – Gyp. Panel Products for use in UL Classified Systems

GA-605 Type “C”: Ex. Mfg. Name & UL Type

- American Gypsum: AG-C
- CertainTeed: ProRoc Type C
- GP: Type 5
- LaFarge: Type LGFC-C/A
- National Gypsum: Type FSW-C
- Pabco: Type PG-C & Type C
- Temple-Inland: Fire Rated Type TG-C
- USG: Type C

* not all mfg.’s “C” core panels listed. See mfg.
GA-605 Type “X” : Ex. Mfg. Name & UL Type

- American Gypsum: Type AGX-1, AGX-11
- CertainTeed: ProRoc Type X
- GP: Type 9
- LaFarge: Type LGFC6A
- National Gypsum: Type FSW
- Pabco: Type PG-11
- Temple-Inland: Fire Rated Type X
- USG: Type SCX

* not all mfg.’s “X” core panels listed. See mfg.
Orientation of Gypsum Panels on Walls

Perpendicular to the studs (horizontally applied)

Parallel to the studs (vertically applied)
Orientation of Gypsum Panels on Walls

• Conventional studs (minimum 25 gauge)
• Light gauge studs (equivalent thickness)
Orientation of Gypsum Panels on Walls

On Conventional Studs

• Vertical application – Standard

• Horizontal application – Referenced in the IBC and GA 600 – Based on an old test

• Achieved by most wallboard manufacturers at UL
Orientation of Gypsum Panels

On Light Gauge Studs

• Vertical application – Standard - Most manufacturers

• Horizontal application – Only achieved at UL with certain manufacturers
Fire Performance

Light Gauge Steel Stud Construction – UL U419

- Perpendicular (horizontal) installation with aligned horizontal joints
  - Top-down construction

1-hr Rated System Horizontal Without Backing
VERTICALLY
1 HOUR GYPSUM BOARD APPLIED WALL

STUDS 16” O.C.

JOINTS IN FINISH LAYERS TO RECEIVE PERF-A-TAPE AND JOINT COMPOUND
Repair Gypsum Panels

- Incidental Tears
- Small Indentation
- Fractured Core
- “Crease in Panel”
- Back Paper Damage
Repair Small Holes
Repair Large Holes

Partial Elevation - 1

Stud

Existing gypsum panel

Line of patch removal

Existing gypsum panel
Innovations

- Mold – Resistant Boards
- Lightweight Gypsum Panels Regular Core
- Lightweight Gypsum Panels
- Dust Control Joint Compound
